

Press Release - 08.08.2018

We were given the honor to participate in a telephone interview to talk about our anti-drone solutions that was recorded in advance for France Culture radio station and diffused Wednesday morning, August 8th 2018. We would like to clarify the following points:

1. Jamming (or Electronic Countermeasures) is a technology that is restricted in sale and usage. Only Law Enforcement and the Military may procure such materials. In addition, thus far CerbAir, does not sell this type of technology ourselves, but can integrate third-party systems chosen by the end client.
2. The Journalist's remarks may have given reason to believe that a CerbAir system was installed to protect the Holiday house of President Emmanuel Macron. Even though it is not the case today, our solutions are well adapted for this type of site and we would be more than happy to work with the President's security team on the matter.
